WHAT IS SOCIAL ENGINEERING?

Social Engineering is a method people use to trick or influence others to give up their sensitive information!

How do I stay safe online?

If you are unsure about someone or something you saw online, don't be afraid to speak out. Tell your parent or guardian!

AVOID TELLING STRANGERS WHO YOU ARE!

Never give out:

- » Your real name or age
- » Where you live
- » Where you go to school
- » Who your family is

SOME PEOPLE MAY PRETEND TO BE SOMEONE ELSE ONLINE.

They may lie to you about:

- » Their age or gender
- » Why they're talking to you
- » Who they work for

BLOCKING USERS ON SOCIAL MEDIA

Before signing up for new websites or social media, ask your parents or guardians first so they can check if it's safe!

If someone is bothering you online, you can report and or block them.

Sometimes people bully others online, reporting and blocking them is the best way to handle them.

Various social media may have different reporting methods, but it should have a similar process to one another.

If you are unsure on how to block someone, ask a parent or guardian for help or find a 'Contact Us' page to ask an admin for help!
